# Introduction

If you're reading this, chances are you're searching for a better smile.

We have many years' experience and training in a large range of cosmetic dental techniques, making us the team to trust for yours.

If you're not happy with your smile, you may not smile as often as you'd like due to lack of confidence, but with a smile makeover, all this can change... With a customised treatment plan, comprised of one or more cosmetic dental treatments, using innovative cosmetic dental techniques, you can turn your dream smile into reality.

## Meet Dr Alex

Dr Alex Devellerez is passionate about helping feel confident and comfortable in their smile. And with his extensive and experience in cosmetic dentistry, you can relax knowing you're in safe and qualified hands.

Over the years, Dr Alex and his caring, qualified dental team have worked with hundreds of patients who felt embarrassed to smile and lost their confidence as a result.

## Meet Dr Simon

Simon has been with Sparkle Dental since 2007.

Helping patients deal with anxiety while providing the best dental care, is one of the most rewarding parts of his role as a dentist and brings a smile to his face when he thinks of all the patients he's helped with the spectrum of sedation options available, from using nitrous or 'laughing' gas to help uncertain children get through their first filling, to using twilight sedation to help a 'dental phobic' adult who has been avoiding the dentist for years.

**We look forward to welcoming you to our dental practice**

## The Significance of a Smile

Your smile is one of the first things people notice about you.

Your smile, whether it be one that makes you feel confident or embarrassed, says a lot about you, your lifestyle and wellbeing. Your smile impacts your confidence, self-esteem and personal and professional relationships – your smile is significant.

No matter who you are, or what you do, it's likely that your smile is important to you.

**“They say you’re  
never fully dressed,  
without a smile.”**

### What does your smile say about you?

If you're not happy with your smile, you may not smile as often as you'd like due to lack of confidence within all areas of your life, but with a smile makeover, all this can change...

Smiles are a very personal thing, meaning your treatment plan is designed specifically to your individual goals and needs. Your smile makeover might be as simple as teeth whitening, whereas someone else's may be more complex and include crowns and veneers, or even full teeth replacement.

Whatever your smile makeover needs, at Sparkle Dental, we have many years' experience and training in a large range of dental techniques, making us the team to trust for yours.

# What is Cosmetic Dentistry?

Cosmetic dentistry is dental work that improves the appearance of teeth, gums and bit. It focuses on improving the aesthetics of your smile. This could include treatments, which would make changes to tooth alignment, colour, position, and size.

Not only does an attractive smile look better on the outside and make you feel better on the inside, it can improve your overall oral health too.

While there are many different treatments that can improve the look of your smile, it's important to consult with a dentist and discuss the best treatment option for your individual requirements and budget.

## Cosmetic Dentistry Options

The caring team at Sparkle Dental in Joondalup are here to help you learn about cosmetic dentistry and the range of options available, to help you understand whether it's right for you.

These options include:

### Porcelain Veneers

No matter who you are, or what you do, it's likely that your smile is important to you. If you're not happy with the smile you wear, this can greatly impact your confidence.

If you're dreaming of a new smile and the new found confidence that comes with it, porcelain veneers can help make it possible.

At Sparkle Dental in Perth, we offer a range of cosmetic dentistry services including porcelain veneers, which often form part of a smile makeover.

Porcelain veneers are very thin shells, that are placed over your existing teeth to provide a new surface, whiter colour or new shape. Designed to bond to the front surface of the teeth following minimal removal of existing tooth surface, porcelain veneers are durable and highly resistant to chipping and staining.

## Dental Crowns

No matter who you are, or what you do, it's likely that your smile is important to you. If you're not happy with the smile you wear, this can greatly impact your confidence.

If you're dreaming of a new smile and the new found confidence that comes with it, dental crowns can help make it possible.

At Sparkle Dental in Perth, we offer a range of cosmetic dentistry services including dental crowns, often form part of a smile makeover.

A dental crown (sometimes referred to as a cap) covers the entire tooth, right down to the gum line, completely sealing up the tooth. When correctly fabricated, a porcelain

crown will closely replicate a natural tooth, helping restore strength and integrity to a tooth, badly damaged due to decay or trauma.

Your crown will be a similar shape and size to your original tooth, but can be constructed to help the improve overall appearance of your smile.

**Not sure which option is right for you? Don't worry.**

**The dentists at Sparkle Dental are qualified to provide a range of cosmetic dentistry services and will design a treatment plan specifically to your individual goals and needs.**

## Teeth Whitening

Feel like your teeth have lost their sparkle? Whiter and brighter teeth are possible with our professional teeth whitening services.

- **In-Chair Whitening**

Our in-chair teeth whitening service includes a consultation and a one-hour whitening session.

- **Take-Home Whitening**

Our take-home teeth whitening service includes a consultation, impressions for you to take home and a teeth whitening kit. Whiten your teeth in the comfort of your own home for a minimum of two hours at a time.

## Design and Test Drive Your Smile

Do you wonder what your new smile will look like after dental treatment? Wish you could see a preview or a sneak peek before you proceed?

At Sparkle Dental, we value the happiness of our patients and want you to be 100% happy with your new smile. So, we offer advanced services to help us make that happen.

With the latest in dental digital technology, Digital Smile Design and Smile Test Drive allow you to preview and experience your brand-new smile, before your treatment has even begun.

## Digital Smile Design

Digital Smile Design is a unique approach to modern dentistry, revolutionising smile makeovers and the results they offer. Using the latest technology in Digital Smile Design, you'll have the opportunity to review an on-screen mock-up of your beautiful new smile.

It even visualises a wide range of facial expressions, showing you how your smile will look when you talk or laugh, helping design a smile unique to you and your individual personality.

Not only does Digital Smile Design help you envision your future sparkling smile, it helps us plan restorative treatments more efficiently, giving you the best possible results.

If you don't love what you see, you can even discuss possible changes with your dentist.

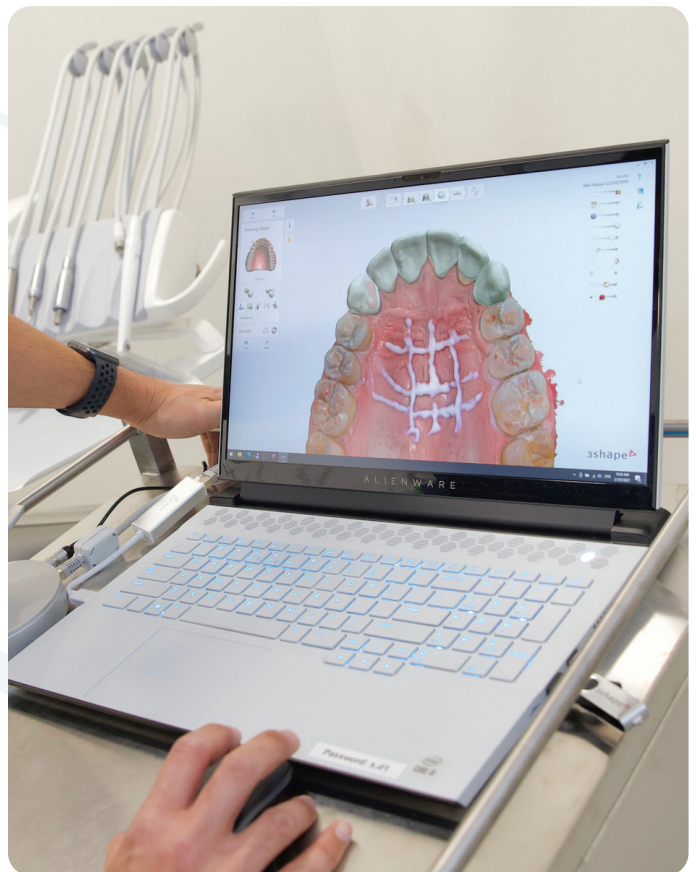

## Smile Test Drive

As we all know, the importance isn't just in the look of your teeth, but in the feel of them too. And, only by seeing and feeling your new smile, can you truly begin to feel the emotional and impact, your new smile is going to have on your life.

With Smile Test Drive, the latest in dental digital technology, you can actually test drive your new smile before committing to treatment. Following review of digital oral photos, dynamic videos of you speaking, and tooth impressions, our high-precision 3D printing technology will create a wearable prototype 'mock-up' of your new teeth, allowing you to see exactly how your new smile will look and feel.

You can even take photos and videos of you wearing your model home with you, giving you time to review, consider your treatment and share with family and friends.

# About Sparkle Dental

At Sparkle Dental Joondalup, we're experts in the areas of dental implants, sleep dentistry, cosmetic dentistry and kid's dentistry. Through our high-level training and state-of-the-art technology, we restore confidence in people who have felt too embarrassed to smile for years, and sometimes even decades.

Our team are ready to welcome you and your family with care, understanding, education, safety and experience. Together, we're focused on your comfort, and providing the best dental experience possible, reducing your fear of going to the dentist and creating healthy, happy smiles.

Rest assured that the best treatment for your individual needs will be met with professionalism, care and compassion.

**If you think cosmetic dentistry may be a suitable solution to help you through your next dental treatment, Sparkle Dental look forward to hearing from you.**

## Ready to makeover your smile?

At Sparkle Dental, we care about your smile, and **offer your first consultation completely free.**

This includes one of our friendly, professional and highly experienced staff getting to know you and your smile goals, understanding your dental and medical history, and discussing your various cosmetic dentistry options.
